- Compact & modern design
- Remote management
- Secured by Knox
- QR/Barcode reader

Virtual Reality (VR)

- ◆ The Samsung Gear VR is a virtual reality headset developed by Samsung Electronics, in collaboration with Oculus VR, and manufactured by Samsung. When in use, a compatible Samsung Galaxy device acts as the headset's display and processor, while the Gear VR unit itself acts as the controller, which contains the field of view, as well as a custom inertial measurement unit, or IMU, for rotational tracking, which connects to the smartphone via USB-C or micro-USB. The Gear VR headset also includes a touchpad and back button on the side, as well as a proximity sensor to detect when the headset is on. The Gear VR was first announced on September 3, 2014. To allow developers to create content for the Gear VR and to allow VR and technology enthusiasts to get early access to the technology, Samsung had released two innovator editions of the Gear VR before the consumer version.

IPTV / MATV

◆ DEFINITION SYSTEM/ARCHITECTURE

- Hotels can use the latest hospitality management technology to deliver a differentiated guest experience. Hospitality technologies offer a comprehensive content management solution that enhances the guest experience through efficiency-enhancing technology and perks ranging from more information delivery channels, convenient communication options and efficient room management.

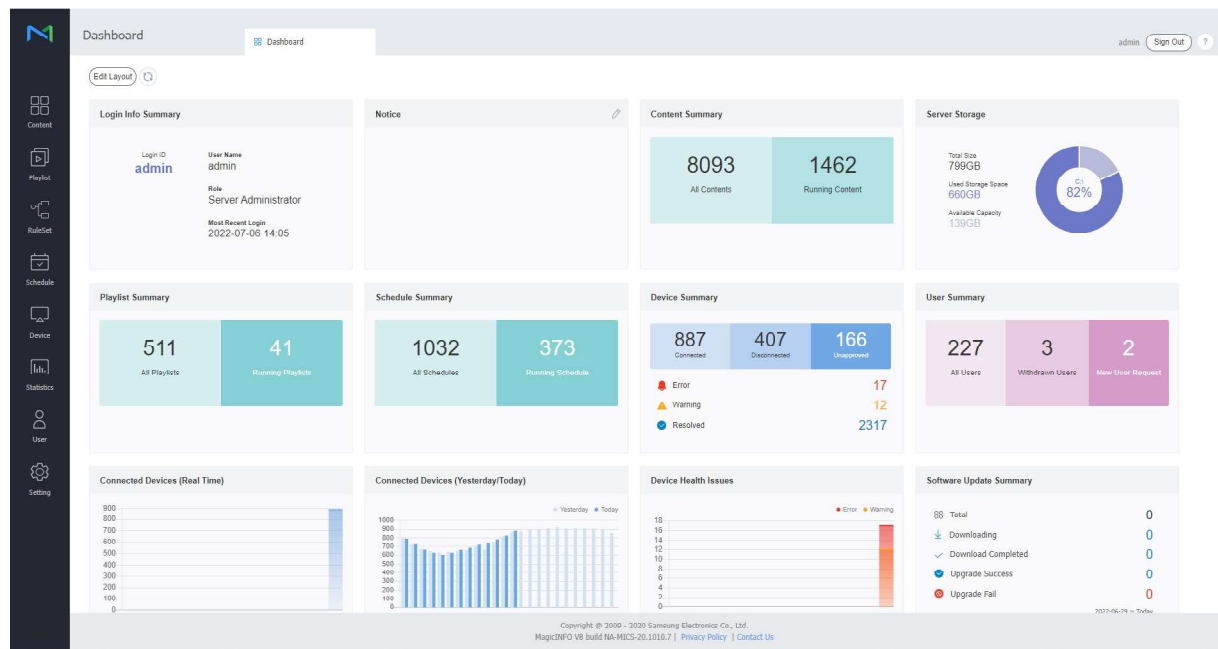

HOSPITALITY

◆ Refined Engagement. On Display

- Deliver a personalized, content-rich guest experience in any hotel environment. Hotel guests expect seamless access to a range of engaging real-time content from the minute they enter the building. From lobby information that directs and educates to customized in-room media consumption, guests seek a personalized experience that guides their stay while creating the familiar feel of home.
